Player one rolls the dice, then turns over the number lever(s) on the board according to the number showing on the dice. For example, if the player rolls a six and a three the player may turn over the following alternatives: 9, 8 and 1, 7 and 2, 6 and 3 and 5 and 4. Player one's turn is over when all of the numbers are turned over or he cannot make a play. The remaining numbers are added together for scoring purposes. Return levers to original position; it is now player two's turn. Low score wins. You may also win by turning over all nine numbers.
